

These pictures show how Dynamiters Bungled the job when they tried to Blow up The Peabody Ltd. Factory at Walkerville, Ont. Can., on Monday June 21st, 1915, at 3 A. M. Manufacturing uniforms for the British Army, and was bombed by German Sympathizers from the American Side.

The bomb was placed in the hole under the boarding at the extreme left in this picture. One side of the framework of the bridge is blown away. The other side bent and twisted, while the concrete is crumbled to powder.

The force of the explosion is clearly indicated in this picture. Every window was blown out. In some instances where the force of the concussion was greatest, the sashes are broken and the sills snapped.

POST CARD

The bomb was placed in the hole under the boarding at the extreme left in this picture. One side of the framework of the bridge is blown away. The other side bent and twisted, while the concrete is crumbled to powder.
